EDUCATION

Bachelor's Degree in Software Engineering
Princess Sumaya University for Technology

09/2020 - 09/2024

WORK EXPERIENCE

Load & Performance Engineer
Quality Professionals

03/2025 - Present
Software Testing Consaltancy Company Based in Dubai

- Tested software performance for various clients under different loads and enviroments.
- Reported findings to clients though detailed documents and charts.
- Used JMeter, K6, & LoadRunner for correlating, recording, and testing given different scenarios.
- Used Fiddler to record web sessions.
- Conducted performance analysis of client software applications, evaluating key parameters to identify areas for optimization and improvement.
- Documented findings in detailed reports.

Intern
AppTrainers

11/2024 - 03/2025
IT Company, specialized in mobile application development

- Gained hands-on experience with SCRUM methodology for agile development.
- Developed proficiency in GitHub for version control and collaboration.
- Learned and applied MVC design pattern for efficient state management.
- Implemented localization with dynamic RTL and LTR layout and translation.

Intern
Orange

07/2024 - 10/2024

- Worked with a team consisting of 8 members to deliver a functional four-legged robot that aids in rescue missions.
- Followed guidance from Orange team mentors to ensure project success.
- Developed 2 websites; an admin dashboard and a landing page.
- Connected APIs to facilitate live video feed, user authentication, and real-time notifications.

SKILLS

Flutter | Dart | APIs | HTML | CSS | Javascript | React | Postman | Figma | Local Storage | State Managment | Git | Github | JMeter | K6 | LoadRunner

FLUTTER PROJECTS

ProServe (01/2025)
- An application for service provider allocation.
- Implemented the application based on the given design.
- Used flutter screen-util to utilize it for all screen sizes and shapes.
- Implemented the MVC design pattern using Provider.

Carzpay (12/2024)
- A Buy Now Pay Later solution to car maintenance payments.
- Fully designed and implemented the front-end.
- Integrated back-end using REST APIs.
- Integrated notifications using OneSignal

SwiftSpot (04/2024)
- A mobile application that connects users to private parking spaces.
- Implemented localization using the l10n package.

CERTIFICATES

2nd Place in Orange Summer Challenge (11/2024)
Issued by Orange Jordan's CEO in recognition of team's win.

2nd Place in Fintech Rally Hackathon (07/2024)
Issued by JOPACC upon completion of a 30-hour training program covering various topics before the hackathon, where our team emerged as a winner.

Youth Pass (10/2022)
Issued by Erasmus+ for participating in an intercultural exchange and global awareness initiative.

VOLUNTEERING

Software Testing Volunteer at Tamatem
Volunteered to test newly developed mobile applications and communicated my findings to the tamatem team.
